A SECOND VISIT TO WEST MAIN!

February 22nd, 2014 - Carver Recreation Center (at The Jefferson School) 10am-1pm

The outcome of this City-led project will be an updated action plan for the West Main Street corridor from the Downtown Mall to Jefferson Park Avenue, in addition to construction documents for streetscape improvements at key segments along the corridor. We have incorporated feedback from the first public event in the development of alternatives. We are presenting these today for your input. A preferred alternative will be developed and presented to the community in the spring, and the final action plan will be completed by summer. Construction documents will begin shortly thereafter.

At today’s event, we would like your input on several alternative approaches for improving West Main Street. The stations around the room highlight ideas for potential changes. More information about these stations can be found on the other side of this sheet.
The Stations

**STATION 1: Lessons Learned Thus Far**
- Get up to speed with community input from the first Public Event: A Taste of West Main.

**STATION 2: Introduction to the Alternatives**
- Learn about the planning principles and design elements that have been used to develop the street alternatives presented today.

**STATION 3: Alternative A: “Woonerf” Street**
- The first alternative to consider: a shared street option that accommodates multiple modes of travel along West Main.

**STATION 4: Alternative B: Asymmetrical Street**
- The second alternative: a street space that varies along its length to accommodate a variety of north- and south-side uses while responding to multiple travel mode requirements.

**STATION 5: Alternative C: Boulevard/Cycletrack**
- The third option: a central median on West Main to serve as a cycle track while providing visual enhancement for the street.

**STATION 6: Streetscape Character**
- A sampling of the elements that can be used to help define the character of West Main Street.

**STATION 7: Transportation Elements**
- Review multiple circulation and parking ideas for West Main, including options for the Ridge/McIntyre and the 10th Street/Roosevelt Brown intersections.

**STATION 8: Urban Design Analysis**
- Review ideas for future building form, massing, height and use along West Main, and tell us your preferences.

**STATION 9: Comment Table**
- Sit, relax and take time to tell us about the ideas you liked and did not like, and add any ideas that were missed.

If you have any other thoughts you would like to share, please feel free to write them down and leave them with us, or submit them on the website (www.GoWestMain.com). If you would like to sign up for e-mail updates, you can also do so on the website.

**ITS STREETS, ITS NEIGHBORHOODS, ITS FUTURE...**
