» Discussion
LEE D. EINSWEILER

» Principal, Founding Partner
  Code Studio - Austin TX

» 30 Years Planning,
  Zoning Experience

» Recent Work:
  » Asheville (Corridor FBC)
  » Chattanooga (Downtown FBC)
  » Jackson WY (Downtown FBC)
  » Buffalo (Citywide FBC)
  » Denver (Citywide Zoning)
  » Raleigh (Citywide Zoning)
  » Los Angeles (Citywide Zoning)

» Here to code/implement, with no preconceived model
The subcommittee’s preliminary discussions about the corridor suggested that there were several impediments to its success that related to: the design of many of its discrete elements; the codes and design guidelines that govern both the public right-of-way and the adjacent properties; and the review process for new development.

The different character of West Main along its length was not reflected in the planning guidelines and codes governing the corridor, and the expectations for redevelopment were not clear, creating a difficult review process for those wishing to build along the corridor.
EXISTING EUCLIDEAN ZONING

» Separation of Uses
» Sprawling Development Patterns
» Auto-Dominated Landscapes
» Lacking Any Sense of "Place"
» Without a Quality Public Realm
» Or Predictable Outcomes
A new approach to zoning with an increased focus on walkability, predictability and mixed use development.

A call for change - a market-driven response to 50+ years of land use controls that have focused on separating land uses, instead of end results (the built environment).

**A. Natural (N-)**
Consists of lands approximating or reverting to a wilderness condition, including lands unsuitable for settlement due to topography, hydrology or vegetation. A natural landscape with agricultural use often present.

**B. Rural (R-)**
Consists of sparsely settled lands in open or cultivated states. Typical buildings are farmhouses, agricultural buildings and camps. Limited retail activity is located in specifically designated centers.

**C. Suburban (S-)**
Consists of single-family detached housing with some opportunities for attached housing. Commercial activity is typically concentrated in nodes and corridors along major roadways.

**D. Urban (U-)**
Consists of attached and detached housing types such as single-family houses, row houses and apartments. Commercial activity is concentrated along major roadways and at neighborhood nodes.

**E. Center (C-)**
Consists of the highest density and height, with the greatest variety of uses. Attached buildings form a continuous street wall. The highest pedestrian and transit activity is encouraged.

**F. Special (SP-)**
Consists of large scale civic, institutional, heavy industrial and conservation areas which do not fit easily into other contexts. These uses may also occur within other context areas in smaller concentrations.
FORM-BASED CODES OFFER A NEW APPROACH TO ZONING
2.9. RM-2: Residential Multi-Family

Description
RM-2 is intended to accommodate a variety of residential options including single-family, two-family and multifamily. Building type options include detached house, backyard cottage, cottage court, duplex, attached house, four-plex, townhouse and apartment. RM-2 should be applied in areas where the existing or proposed land use pattern allows for a variety of residential options. Uses that would substantially interfere with the residential nature of the district are not allowed.

Building Types Allowed
- Detached house see Sec. 6.2.2
- Backyard cottage see Sec. 6.2.3
- Cottage court see Sec. 6.2.4
- Duplex: side by side see Sec. 6.2.5
- Duplex: back to back see Sec. 6.2.6
- Attached house see Sec. 6.2.7
- Four-plex see Sec. 6.2.8
- Townhouse see Sec. 6.2.9
- Apartment see Sec. 6.2.10

1. Lot Dimensions

<table>

</tbody>
</table>

All lots 40 feet or less in width are required to take vehicular access from a rear alley, except cottage courts.

Coverage
- Lot coverage: 60% max

2. Building Placement

Building and Structure Setbacks
- Primary street: 5' min / 15' max
- Side street: 5' min / 15' max
- Side interior: 5' min
- Rear: 15' min
- Rear, abutting alley: 4' or 20' min

Build-to Zone (BTZ)
- Building facade in primary street: 60% min
- Building facade in side street: 30% min
- All buildings and structures: 3.5 stories / 40' max

3. Height

Height
- All buildings and structures: 3.5 stories / 40' max

CLEAR, PREDICTABLE RESULTS
### Article 3 Building Envelope Standards

#### 3.10 Mixed Use and Industrial Districts

##### 3.10.3 Frontage Standards

**SHOPFRONT**

- **PLACE**
  - Shopfront Frontage with less than 30 feet of frontage and one approval of the Planning Director, structures may be located closer to the ROW line than the minimum setback provided for the street. The new structure shall be located within the range of front setbacks on the street. This range of setbacks is based on the fronts of the four structures surrounding the project site. The two closest lots in either direction along the street. The new structure shall be located within the range of front setbacks on the street. The setback shall be, or further than the closest setback. Where a setback in these four lots is significantly less than the range of setbacks along the street, it may be eliminated from the range.

- **REQUISITE BUILDING FRONTAGE**
  1. Primary street (sites 100 ft. or more in width). The building facade must be located within the setback area for not less than 80% of the site width.
  2. Primary street (sites less than 100 ft. in width). The building facade must be located within the setback area for not less than 70% of the site width. For sites under 100 ft. in width, the required building frontage may be reduced to accommodate no more than a single 20-ft. access drive for a rear parking area.
  3. Side street. The building facade must be located within the setback area for not less than 40% of the site depth.

- **SIDE/REAR SETBACKS**

- **PARKING SETBACK**
  1. Primary street setback. Min 30 ft. behind ROW line.
  4. Parking shall be located behind the parking setback line. No parking is permitted between the street and the building. This requirement shall not exceed 3 ft. in depth and one floor in height.
  5. On street parking is required.

**TRANSAPRENCY (WINDOWS & DOORS)**

- **GROUND FLOOR ELEVATION**
  - For ground floor residential uses, the ground floor finished elevation shall be a minimum of 18 inches above the adjacent sidewalk. There is no minimum for ground floor nonresidential uses.

- **FLOOR HEIGHT**
  1. Ground floor shall have a floor to floor height of at least 14 ft.
  2. Each upper floor shall have a floor to floor height of at least 9 ft.

- **BUILDING ENTRANCE**
  - A functioning entrance, operable during normal business hours, is required facing the primary street. An angled entrance may be provided at either corner of the building along the primary street to meet this requirement.
  - A building located on two primary streets shall have either one entrance per frontage or provide one angled entrance at the corner of the building at the intersection. Buildings located on corner sites shall meet all applicable intersection sight distance requirements. Additional entrances of another street, pedestrian area or internal parking area are permitted.
  - A minimum of 50% of the required entrance shall be transparent.
  - Reclined entrances shall not exceed 3 ft. in depth and one floor in height.

- **BLANK WALL AREA**
  - Blank lengths of wall exceeding 25 linear ft. are prohibited on all primary and side street building facades.
WHY A FORM-BASED CODE?

» ECONOMIC DEVELOPMENT
» PUBLIC SAFETY & HEALTH
» GOVERNMENT ACCOUNTABILITY
» TRANSPARENCY & ENGAGEMENT
ECONOMIC DEVELOPMENT

» Right Rules, Right Place
  » Zoning Customized for Each Place
  » Allows greater innovation within the "box"

» Unlocks the Potential of Local Plans
  » Plans are Achieved, NOT Shelved

» Walkable, Mixed-Use Environment
  » Allows developers to "lead the market"
  » Results in premium products from developers

» Levels the "Playing Field" for the "Little Guy"
  » Land Assembly, Specialized Attorneys Not Needed
PUBLIC SAFETY & HEALTH

» Provides "Eyes on the Street"
  » Active Streets Reduce Opportunities for Crime

» Enhances Mobility
  » Walking and Biking Options for Improved Public Health
GOVERNMENT ACCOUNTABILITY

» Development Review
  » Technical Checklist, NOT a Negotiation
  » First Plan = Best Plan, NOT a Strategy for Compromise
  » Meet the Code = Get Your Permit
TRANSPARENCY & ENGAGEMENT

» Community Involved in Critical Decisions

» Designing in Public, Frequent Feedback Loops
IN SUMMARY . . .

» Focus on Form, Results
» Predictable for All
» Planning/Design-Based
» Streets + Private Development
CHARACTER

» Existing Zoning
  » Splits North/South

» West
  » Large-Scale Building Fabric
  » Few Historic Buildings

» East
  » Fine-Grained Building Fabric
  » More Historic Buildings
EXISTING CODE VS. PROPOSED

» Large, "Out of Context" Buildings
  » Reduced Allowed Height and Set Stepback Location
  » Neighborhood Transition to Adjacent Zoning Districts

» Poor Activation of Street Edge
  » Transparency (Doors and Windows) Requirement
  » Blank Wall Length Limit
  » Entrance Spacing Requirement

» Review Process
  » Reduced Negotiation
  » Deleted SUP for additional height

ARTICLE 2. DISTRICTS

Div. 2.1. Rules Applicable to All Districts

The following general rules apply to all WM- Districts unless expressly stated otherwise.

A. Lot

1. Lot Width
   Lot width is the distance between the two side lot lines measured at the primary street property line along a straight line or along the chord of the property line on a curvilinear lot.

2. Lot Area
   Lot area is the area included within the rear, side and front lot lines. Lot area does not include existing or proposed right-of-way, whether dedicated or not dedicated to public use.

B. Building Setbacks

1. Generally
   There are 4 types of setbacks – primary street, linking street, side interior and rear. Building setbacks apply to both principal and accessory buildings or structures except where explicitly stated otherwise.

2. Measurement of Building Setbacks
   a. The primary street setback is measured at a right angle from the primary street right-of-way line.
   b. On corner lots, the linking street setback is measured at a right angle from the linking street right-of-way line.
   c. The rear setback is measured at a right angle from the rear property line or the rear right-of-way. The rear property line is the property line opposite the primary street property line.
   d. All lot lines which are not primary street, linking street or rear lot lines are considered side interior lot lines for the purpose of measuring setbacks. Side interior setbacks are measured at a right angle from the side property line.

3. Use of Setback Area
   The primary or linking street setback area may be used for extension of the sidewalk, plaza, outdoor dining, seating, landscaping, or other similar uses.

C. Primary Street Designation

1. Where only one street abuts a lot, that street is considered the primary street.

2. Where more than one street abuts a lot, the following are considered primary streets:
   a. West Main Street;
   b. Roosevelt Brown Boulevard;
   c. Commerce Street;
   d. South Street;
   e. Jefferson Park Avenue;
   f. Wertland Street;
   g. 10th Street NW;
   h. 7th Street SW;
   i. 4th Street NW; and
   j. Ridge Street.

3. Where a double frontage lot exists, each frontage is considered a primary street.
P. Building Elements

Individual building elements are allowed in each district.

1. Awning/Canopy
   A wall-mounted, cantilevered structure providing shade and cover from the weather for a sidewalk.
   a. An awning/canopy must be a minimum of 9 feet clear height above the sidewalk and must have a minimum depth of 6 feet.
   b. An awning/canopy may extend into a required setback.
   c. An awning/canopy may encroach up to 9 feet into the public right-of-way but must be at least 2 feet inside the curb line or edge of pavement, whichever is greater.

2. Balcony
   A platform projecting from the wall of an upper-story of a building with a railing along its outer edge, often with access from a door or window.
   a. A balcony must be at least 4 feet deep and may extend up to 6 feet into a required setback, provided that such extension is at least 2 feet from the vertical plane of any lot line.
   b. A balcony must have a clear height above the sidewalk of at least 9 feet.
   c. A balcony may be covered and screened to protect from insects, but cannot be fully enclosed.
   d. A balcony may encroach up to 6 feet into the public right-of-way but must be at least 2 feet inside the curb line or edge of pavement, whichever is greater.
A. INTENT
1. The intent of the West Main-1 District is to create a walkable, mixed use "main street" setting that encourages vibrant pedestrian activity.
2. The district is also intended to provide the opportunity for large-scale redevelopment influenced by the location near the University.
3. The district allows a height of 6 stories. Height steps back from Main Street above 60 feet.
4. A tall ground floor encourages retail development.

B. LOT CRITERIA & SITING

<table>
<thead>
<tr>
<th>Lot</th>
<th>Width (min)</th>

  - Nonresidential, primary/linking street: 60% / 40%
- **B** Upper story (min): 20%
- **C** Blank wall area length (max)
  - Residential: 20’
  - Nonresidential: 30’

**Pedestrian Access**
- **D** Entrance facing primary street: Required
- **E** Entrance spacing along primary street (max): 100’
ARTICLE 2. DISTRICTS

A. INTENT

1. The intent of the West Main-2 District is to create a walkable, mixed-use “main street” setting that encourages vibrant pedestrian activity.

2. The district is also intended to retain the fine-grained pattern of existing buildings.

3. The district allows a height of 4 stories. Height steps back from West Main Street above 40 feet.

4. Where low-density residential areas abut the district, it is intended to provide a transition in mass as well as a buffer for the surrounding area.

5. A tall ground floor encourages retail development.

B. LOT CRITERIA & SITING

</tbody>
</table>
C. HEIGHT

Building Height

A. By-right, stories/feet (max) 4 stories / 52'
B. Minimum 2 stories / 27'

Story Height

C. Ground floor (min) 15'
D. All other floors (min) 9'

Ground Floor Elevation

E. Residential (min/max) 1.5’ / 3’
F. Nonresidential (min/max) 0’ / 3’

Building Stepback

G. Height without stepback (max) 40'
H. Primary street stepback (min) 10'

Neighborhood Compatibility

Abutting WM- District Not required
Abutting any other district (see Sec. 2.1.K) Required

D. ACTIVATION

Transparency

A. Ground story (min)
   Residential, primary/linking street 50% / 30%
   Nonresidential, primary/linking street 60% / 40%
B. Upper story (min) 20%
C. Blank wall area length (max)
   Residential 20'
   Nonresidential 30'

Pedestrian Access

D. Entrance facing primary street Required
E. Entrance spacing along primary street (max) 50’
COMPARISON: WM-1 AND WM-2

» Intent
  » "large-scale" versus "fine-grained"

» Height
  » WM-1 (West) 6 Stories, 75'
  » WM-2 (East) 4 Stories, 52'

» Stepback
  » WM-1 (West) 60' - 5 stories
  » WM-2 (East) 40' - 3 stories

» Entrance Spacing
  » WM-1 (West) 100'
  » WM-2 (East) 50'
3. Side: Addition
Side additions are not allowed because where the extension increases the width of the building not located in the build-to zone, a side addition that extends into the build-to zone is allowed (see Front: Addition above).

4. New Buildings
Where a new building is being constructed on a lot or site with an existing building that doesn’t meet the building facade width requirement, the following provisions apply. Where the location of a new building on the same site as a contributing structure conflicts with historic character, the Board of Architectural Review may modify the provisions of this paragraph.

a. Front: New Building
All new buildings must be placed in the build-to zone until the build-to percentage for the lot has been met.

b. Rear: New Building
New buildings located outside of the build-to zone are not allowed until the build-to percentage for the lot has been met.

c. Side: New Building
New buildings located outside of the build-to zone are not allowed until the build-to percentage for the lot has been met.

E. Parking Location
Where parking is allowed to the side of a building, it must be located at least 15 feet from the back of sidewalk, and the area between sidewalk and the parking must be used for landscaping, pedestrian plaza or other similar purposes (including street furniture and outdoor dining).

F. Setback Encroachments
All buildings and structures must be located at or behind the required setbacks, except as listed below. Unless specifically stated, no building or structure may extend into a required easement or public right-of-way.

1. Building Features
a. Porches, stoops, balconies, galleries and awnings/canopies can extend into a required yard as stated in Sec. 2.2.P.
Div. 2.4. Design Standards

A. Parking Structures

1. Parking structures must meet all the requirements for a principal structure. In no case is structured parking allowed to exceed the height of the principal building.

2. The ground story of a structured parking garage facing a primary street must have active uses (such as, but not limited to, residential, commercial, office or civic space, where permitted) located between the parking structure and the street.

3. Where feasible, parking structure entrance and exit must take place on a linking street.

4. Where upper stories of structured parking are located at the perimeter of a building, they must be screened so that cars are not visible from ground level view from adjacent property or adjacent public street right-of-way (not including an alley).

5. Architectural and vegetative screens must be used to articulate the facade, hide parked vehicles and shield lighting. In addition, any ground floor facade treatment (building materials, windows, and architectural detailing) must be continued on upper stories.

6. Parking structure entries must not exceed 16 feet clear height and 25 feet clear width.
### Div. 3.1. Table of Permitted Uses

This Section establishes the uses allowed. A lot or building must be occupied with only the uses allowed in this section. Multiple uses allowed in the District may be established on a single lot.

ARTICLE 4. GENERAL DEVELOPMENT STANDARDS

Div. 4.1. In General
The standards in Article VIII, Improvements Required for Developments and Article IX, Generally Applicable Regulations apply, except where expressly modified in this Section 4.

Div. 4.2. Off-Street Parking and Loading
A. Article VIII, Division 3, Off-Street Parking and Loading, applies, except that:
   1. Parking lot existing property line buffers are required only where the parking lot abuts a residential district outside of these Form Districts.
   2. No parking is required for existing or new retail spaces less than 5,000 square feet in floor area.

Div. 4.3. Bicycle Parking
A. Required Spaces
The following bicycle parking spaces are required for new development or the addition of new enclosed floor area.

<table>
<thead>
<tr>
<th>Use</th>
<th>Spaces Required</th>
<th>Short-Term/Long-Term</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential</td>
<td>0.5 per unit</td>
<td>80% / 20%</td>
</tr>
<tr>
<td>Public/institutional</td>
<td>1 per 5,000 SF, 2 min</td>
<td>90% / 10%</td>
</tr>
<tr>
<td>Food &amp; drink service</td>
<td>1 per 2,500 SF, 2 min</td>
<td>80% / 20%</td>
</tr>
<tr>
<td>Lodging</td>
<td>0.5 per guest room</td>
<td>80% / 20%</td>
</tr>
<tr>
<td>All other commercial or industrial uses</td>
<td>1 per 2,500 SF, 2 min</td>
<td>80% / 20%</td>
</tr>
</tbody>
</table>

B. Location of Required Bike Parking
1. General Requirements
   a. Bicycle parking spaces must be located on paved or pervious, dust-free surface with a slope no greater than 3%. Surfaces cannot be gravel, landscape stone or wood chips.
   b. Bicycle parking spaces must be a minimum of 2 feet by 6 feet. There must be an access aisle a minimum of 3 feet in width.
   c. Each required bicycle parking space must be accessible without moving another bicycle, and its placement must not result in a bicycle obstructing a required walkway.
   d. Up to 25% of bicycle parking may be structured parking, vertical parking or wall-mount parking, provided there is a 5-foot access aisle for wall mount parking.
   e. All racks must accommodate cable locks and "U" locks, must permit the locking of the bicycle frame and one wheel to the rack, and must support a bicycle in a stable position.

2. Short-Term Bicycle Parking
   Required short-term bicycle parking spaces must be located in a convenient and visible area at least as close as the closest non-accessible vehicle parking. Short-term bicycle parking must meet all other applicable design standards of the City.

3. Long-term Bicycle Parking
   a. Required long-term bicycle parking spaces must be located in enclosed and secured or supervised areas providing protection from theft, vandalism and weather, and must be accessible to intended users.
   b. Required long-term bicycle parking for residential uses cannot be located within dwelling units or within deck, patio areas or private storage areas accessory to dwelling units.
   c. With permission of the Director of Neighborhood Development Services, long-term bicycle parking spaces for nonresidential uses may be located off-site within 300 feet of the site. The off-site parking distance is measured in walking distance from the nearest point of the remote parking area to the closest primary entrance of the use served.
ARTICLE 5. ADMINISTRATION

Div. 5.1. Chapter 34 Procedures Apply

A. The administrative procedures of Chapter 34, Article 1, Administration, apply to these Form Districts.

B. The Director of Neighborhood Development Services will review site plans for compliance with this Article.

C. The Board of Architectural Review will review development and apply any adopted guidelines; however, that review does not include the review of basic elements of form required by this Article such as building height and setbacks.

D. The Zoning Administrator will categorize any uses not listed in this Article.
