

WEST MAIN ST

CHARLOTTESVILLE

ITS STREETS, ITS NEIGHBORHOODS, ITS FUTURE...

Oliver Schulze

February 21st, 2014
Central Library
(in the McIntire Room)
6pm-8pm

Central Library
McIntire Room
201 E Market Street

We live in an incredible time today. As urban visionaries and designers of streets and urban spaces, we have the duty and the great opportunity to transform our urban settlements to provide for a more sustainable blueprint for the urban life of the future. We need to be mindful of the consequences of our lifestyle choices upon the wider local and global community we are a part of.

Streets - like West Main Street - are the ultimate design challenge: They are the most important places where we construct our shared identity of our place, our village, our town and our city. Together we will discuss the things that matter - and explore new ways of looking at street design and how West Main Street can be transformed into a great street for people.

Oliver Schulze's presentation is scheduled for 6-7 pm.
Following the presentation, a reception will be held from 7-8 pm.
